MAKING HEALTHY HAPPEN™

PRODUCT CATALOG 2024

All's Well That Starts Well

We believe healthy starts at the source. Not only with pure, potent ingredients and sustainable practices, but with the intention you put into the world. Our company was founded by Dr. Forrest C. Shaklee, who invented the first multivitamin in the United States and started a wellness revolution.

And people are the foundation of our wellness community—a community that cultivates connections, cheers each other on to live better every day, and changes lives one choice at a time. We call ourselves Generation Health, and we are shaping the way forward in wellness.

Rooted in Nature. Perfected by Science.

We've continued to build on Dr. Shaklee's legacy of innovation. We go beyond industry standards to create breakthrough products in nutrition, home, and personal care, because we understand that health is holistic. And we back these products with a no-questions-asked 100% guarantee.

Two Studies, a Lifetime of Proven Results

The Landmark Studies comprise the first multi-study, comprehensive look at the health impacts of long-term usage of a broad array of dietary supplements.

The two studies, conducted in collaboration with the University of California Berkeley (2005) and, later, Tufts University (2015), compared long-term Shaklee adherents with a control group of US adults who took either no supplements or two or fewer supplements.

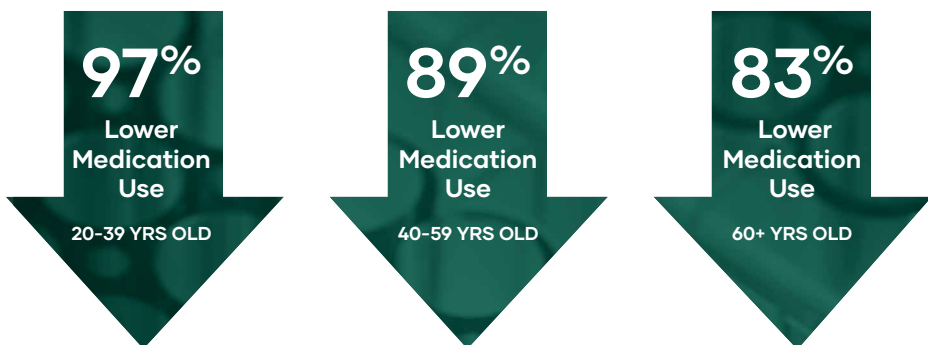

The Results Speak for Themselves

In the first study, members of the Shaklee group had healthier biomarkers and higher blood nutrient levels.* These differences generally persisted over the 10 years between the two studies.

Additional findings from the 10-year follow-up study included a lower usage of medication in the Shaklee group, who were now an average age of 72.

SHAKLEE USERS HAD Lower Medication Usage vs. the US Adults Sample

*Data for comparison groups obtained from NHANES 2007-2010. Long-term Shaklee users clearly demonstrated lower levels of the most important heart-health biomarkers recognized by the American Heart Association.

It's staggering, but true: **your cells are attacked over 500 trillion times every minute**, not only by a modern diet and toxins in the environment but also by the unavoidable cellular wear and tear of simply being alive. - NEUTRALIZE FREE RADICALS*
- PROTECT AGAINST OXIDATIVE STRESS*
- BLUNT INFLAMMATORY RESPONSE**
